

PetroChina Kunlun® T-6302H

Thermoplastic Elastomer

Styrene-Butadiene Block Copolymer

Brief Introduction

PetroChina Kunlun® T-6302H is a linear styrene/butadiene block copolymer.

Specification

Characteristic of Kunlun® T-6302H

Property	T-6302H
Styrene Content, %	30
Oil Content, %.	0
Melt Flow, g/10min.	<1
Hardness Shore A.	-
Solution Viscosity (25%,25℃,mPa.s)	-
Tensile Strength, Mpa	-
Elongation, %	-
300% Modulus, Mpa	-
Ash, %	-
Volatile, %	≤1

Note: Values are typical unless otherwise specified.

Packaging

PetroChina Kunlun® T-6302H is available with the form of pellet and packed in 15kg paper bags.

Applications

PetroChina Kunlun® T-6302H could be used in bitumen modification for roofing and road paving, waterproof membranes, it could be also used in compounding.
